

Snow in Pacolet Mills

Album No. 5

Snow in Pacolet Mills

Almost every year there is some measurable snow in Pacolet. It seems that there might have been deeper snows in years past. I have collected some old snow pictures from several folks and have put them together in this album.

I remember - I think - that when I was very young, about 1940, I saw pictures of the [Pacolet River](#) being partly frozen over up around the [New Mill dam](#). That might be my imagination but if you have seen those photos or better still, have a copy, I would love to hear about it. If you have any of these photos we would love to post them on this site.

In February and March of 1960, it snowed every Wednesday for about three weeks. The snow never melted between the snowfalls and the snow accumulated. The picture above shows the parking lot of the [New Mill or Mill No. 5](#). The building in the top center of the photo was called [The Filling Station](#). It was the location of a café that served the world's best hot dogs. Photo was made by David Smith, Sr., the first mayor of [Pacolet Mills](#).

Another photo of the 1960 snow also made by David Smith Sr. This shows the [New or Upper Mill \(Mill No. 5\) dam](#). It is from the mill side looking across the [river](#) towards the [company pasture](#).

Early photo of a snow fall made before 1903. [Mills no. 1 and 2](#) were located at the same place as the later [New Mill or Mill No. 5](#)

This photo was made in the 1930's or 40's. This stranded car was parked in Limestone Street in front of [Montgomery Memorial Methodist Church](#). The approximate location as it appears today is on the next page.

Approximate location of stranded car as it looks today.

Old picture thought to be from the 1920's. Believed to be made in the "back road" that ran between Limestone Street and Moore Street.

Another photo thought to be from the March, 1960 snow. Looking North up Green St. House in middle of picture is across the intersection with Chapel / Cook Drive. Photo by David Smith, Sr.

Approximate location as it looks today. Note the stump of the large oak tree at the right.

Another view looking North up Green St. Tree is no longer there. Its stump is shown in photo on page 7.

View of tree shown on page 8 taken from a different angle.

Another close up of same tree, looking at the drooping branches and across Green St.

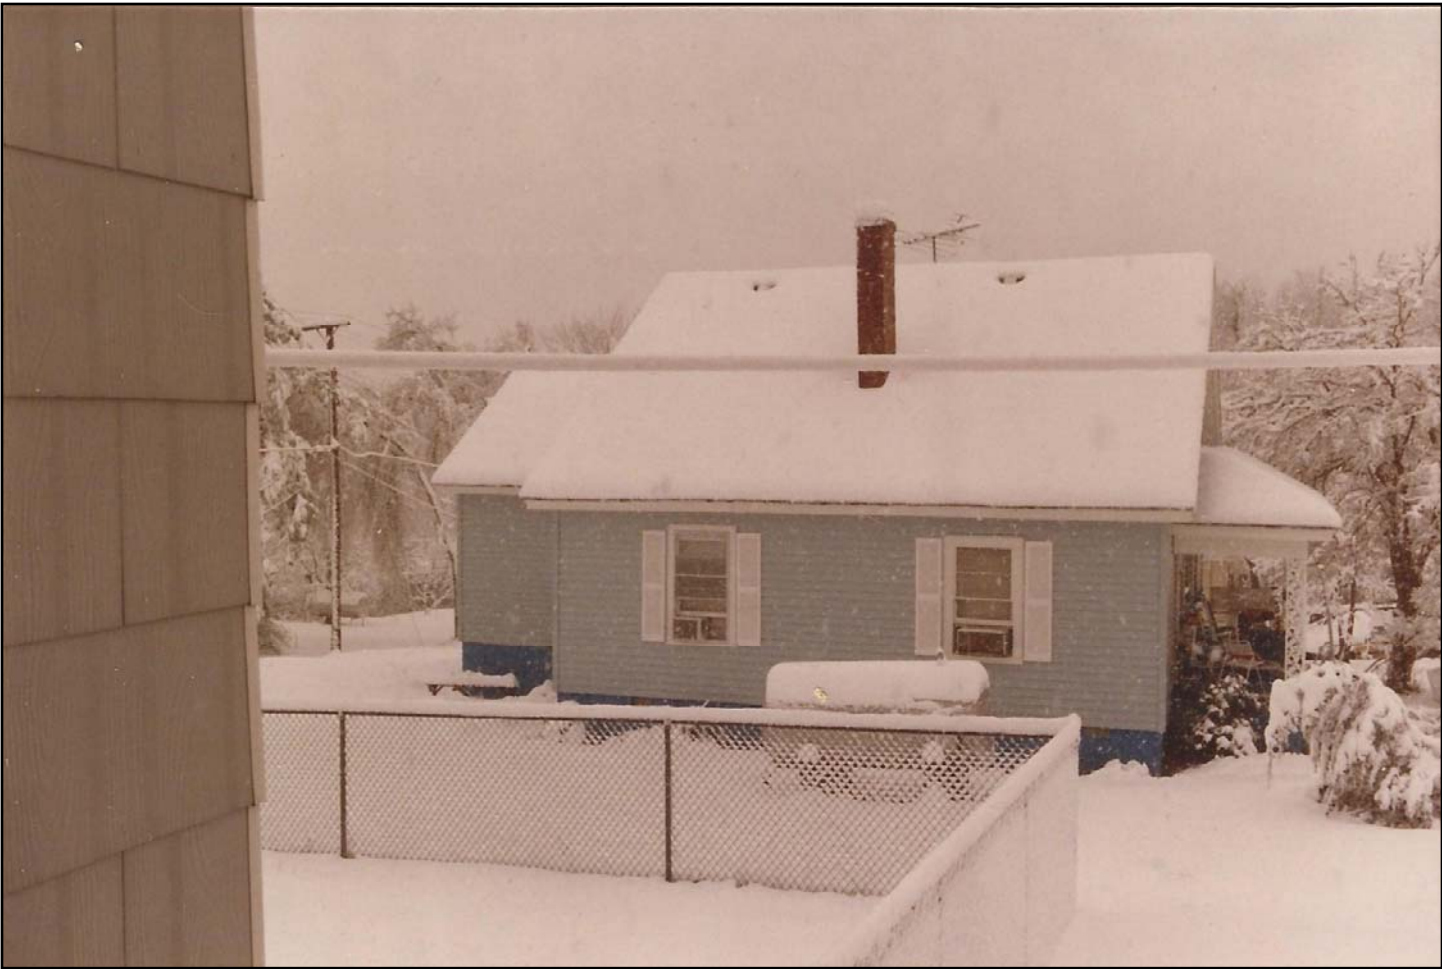

Looking across Green St. Approximate view as it looks today is shown on page 12.

Another view looking across Green St.

Houses across Green St. as they look today.

Next door house looking South down Green St.

Next door house looking South down Green St as it is today.
